

## **STRUCTURED PRODUCTS ENGINEERING TEAM (STRUCTURING) VIE/Traineeship Position - TOKYO**

**Employment Status:** Intern/Trainee (Term contract)

**Duration:** around 12 to 15 months

**Target Starting date:** February/March 2016

**Division:** Global Markets

**Working in the engineering team of Societe Generale in Tokyo, you will participate to all the stages of the structuring and life of the products proposed to large Japanese financial institutions (for distribution to their clients or for own account).**

**Main tasks:**

- Structuring of new products (design of the product, its commercial pitch and legal documentation, as well as engineering of its internal management processes, on all types of underlyings – equities, rates, FX, credit, alternative investment);
- Pricing;
- Management of exceptional events affecting products after their launch.

**Required aptitudes:**

- Quantitative background;
- Basic knowledge in programming;
- Ability to communicate in English (orally and in writing);
- Rigor, intellectual curiosity and adaptability;
- Master's degree student (in particular students of engineering schools).

**Additional skills that would be welcomed:**

- Knowledge of financial products and mathematical finance;
- Ability to communicate in Japanese or French;
- Good command of Excel.
