

The International Prevention Research Institute has positions available for
Full Time Biostatistician(s)

JOB DESCRIPTION:

This full-time position will involve daily management of iPRI projects.

The incumbent will provide analytical support to iPRI's epidemiological studies, will identify, evaluate and apply statistical methods as appropriate, will develop and validate SAS or R programs, will contribute to writing of study protocols, reports, and scientific publications and will participate in scientific and technical international meetings on behalf of supervisors. The incumbent is also expected to supervise students if necessary.

QUALIFICATIONS AND SKILLS:

- Masters Degree in Statistics or Biostatistics or an Engineering Degree (or equivalent)
- Excellent knowledge of a statistical package, preferably SAS or R
- Good data-management skills
- Ability to produce and deliver high-quality statistical analysis
- Ability to write technical reports
- Knowledge of the main designs in epidemiology
- Ability to work with international collaborators
- Good oral and written communication skills
- Excellent knowledge of English and French

STARTING DATE:

January 1st, 2014 or earlier according to availability and agreement.

APPLICATION:

CV to be sent to: secretariat@i-pri.org. It is possible that more than one position will be available depending on the quality of the applications.
