

Role

Candidate will undertake all the necessary middle office activities within the P&SF Department. Duties will cover existing portfolio as well as transactions under consideration/development. Working with the senior bankers, candidate will liaise with the bank's various departments at all levels; specifically, she/he will:

- Prepare credit applications and assess customers' performance and prepare annual reviews.
- Prepare comprehensive financial models for various projects to deliver cash flow forecast, scenario analysis, risk assessment and return analysis.
- Work closely with the project development team to identify, analyse and execute the most optimum financing solution for ABC projects (including debt and equity).
- Participate on various tasks during due diligence, term sheet negotiations and documentation.
- Work with project teams to ensure timely compliance with all conditions precedent and other obligations.
- Coordinate the drawdown/repayment formalities for debt facilities and to monitor compliance with financing conditions and obligations.
- Support senior bankers on various financing related matters on an ongoing basis
- Perform any other duties assigned by the senior staff.

Qualifications

Between one and three years' professional experience in project/corporate finance, gained primarily within a project finance bank or a corporate house focussed on project development/financing. Prior experience in MENA region shall be an advantage.

Particularly strong financial modelling skills, capable of building from scratch sophisticated "project finance" financial models; prior experience in use of VB and Macro tools with MS-Excel is a must.

Proficiency in other Microsoft Office tools such as Word and PowerPoint.

Knowledge of project finance documentation and experience of handing financial closing work is essential.

Self-starter with strong self-motivation and a proven capacity to work in a demanding environment.

Result-oriented approach with hands-on execution capability.

Masters in Finance, preferably with a strong engineering background.

Language skills: English, excellent knowledge both written and orally. Arabic is a plus.
