

# TAKE UP YOUR POSITION ON OUR TEAM

## Junior Structurer Trainee- h/f

### Your environment:

Societe Generale Corporate & Investment Banking (SG CIB) is one of the three pillars of Societe Generale. Present in all major markets with nearly 12,000 employees in 33 countries across Europe, the Americas and Asia-Pacific, we are a vital player in fuelling the economic growth through our key role of intermediary between issuers and investors.

### Your role:

Within the engineering team of Societe Generale's Global Equity Flow business line (GEF), you will assist the person in charge of structuring matters.

Your missions are:

- Standardising products issuance processes
- Participate in the execution and delivery of innovative investment products which may for instance involve performance enhancement and risk mitigation, while keeping in mind legal and regulatory requirements, tax and accounting considerations as well as operational impact.
- Get involved in the packaging of investment ideas promoted by GEF engineering team, covering various underlyings (equities and volatility for example).
- Coordinate with other teams within Societe Generale in order to ensure smooth execution and delivery

### Your profile:

With Strong academic record within Engineering, Finance, Mathematics and/or Law and an interest in financial instruments, you ideally have a previous experience in market with mathematical, engineering and/or legal/regulatory training. Interested in markets and derivatives, you're autonomous and organised with a strong team spirit. You're fluent in English (French language is a plus).

Other Requirements: -Microsoft Office skills (Excel, PowerPoint, Word).

-Technical and mathematical skills

-Proven analytical, IT and interpersonal skills

-Exceptional writing, communication and presentation skills

-Ability to work in a fast paced and demanding environment.

-Legal and regulatory skills are a plus
